2-22 1949

This index, arranged alphabetically by author, title, and subject, covers all articles appearing in these volumes of *Refrigerating Engineering* and includes technical papers presented at the National Meetings of The American Society of Refrigerating Engineers. Discussers of Meeting papers, letters of comment, and other pertinent material, are listed under the author reference of the paper in question. News items of the industry and ASRE activities are not listed.

Material published in earlier volumes has been indexed as follows:

1904-1934--index printed in Dec. 1934 issue--\$1.50
1935-1940--index printed in 20-page leaflet--\$1.00

Material published after December 1945 is catalogued and abstracted in the quarterly issues of *Refrigeration Abstracts*, published by ASRE.

A volume index is published in each June and December issue.
